HC-CARGO AMBER LED Lightbars

The all new 12 and 24V LED Lightbars from HC-CARGO are built in unbreakable polycarbonate with an aluminum base for rigidity, stability and optimum heat dissipation.

THE LED LIGHTBARS ARE ALL ECE R65 APPROVED

The Lightbars come in 3 different sizes. 65, 110 & 140 cm wide, fully equipped with 6 LED Xtreme Front/Rear modules and with 12 LED Xtreme corner modules which gives a superior 360 degrees light spread. The LED Lightbar offers the possibility of numerous different flash patterns, with the possibility of building in alley lights. They are all equipped with multi adjustable mounting feet.

Safety with the LED Light bar

The LED Lightbars with the Xtreme LED modules offer excellent warning light, even on a bright sunny day, making the vehicle more visible to oncoming traffic. The built in traffic arrow function (not applicable for HC-CARGO 171849) offers the possibility to set arrow direction away from the vehicle or arrow function center out signaling road closed. During night time the LED Light bar offers the possibility to reduce the power to the LED Xtreme light heads with a single switch of a button, assuring no oncoming traffic will be blinded.

HC-CARGO 171849

HC-CARGO
171850 / 171851

HC-CARGO
171852 / 171853

LED Lightbars

	171849	171850	171851	171852	171853
